HELLCATS

MISSIONS AT LEYTE GULF WORLD WAR II FLIGHT SIMULATOR

You are a pilot of the Pacific Theater's most notorious fighter aircraft — the F6F Hellcat. Take off from your carrier on a mission to intercept enemy aircraft, bomb strategic targets and strafe enemy airfields.

Missions At Leyte Gulf thrusts you into the Hellcat's prime time! Load your Hellcat with either torpedoes, rockets or bombs. Support a ground assault as you fly loaded with 5-inch rockets to neutralize enemy tanks and ground vehicles. Protect your fleet positions against sub attack with a choice of conventional 500 lb. bombs or torpedoes.

HELLCATS utilizes new simulation technology resulting in truly high-speed graphics which provide a sense of fluid motion never before seen in a flight simulator. Aerodynamic characteristics of aircraft control surfaces are carefully simulated to create uncanny realism. You feel that you are actually in control of a Hellcat!

HELLCATS offers the utmost in flight simulator realism along with the excitement of an intense dog fight and a well-placed 500 pounder!

FEATURES:

- Flight simulation includes aileron, rudder, elevator, flap and landing gear control.
- Instrument panel displays air speed, vertical climb, heading, fuel, ammunition, flap, gear, altimeter, engine RPM, artificial horizon and enemy position radar.
- Multiple scenarios with objectives are carried out in a vast and highly detailed 3D database.
- Custom rendering and digitized sound technologies enhance user enjoyment and playability.
