

Enfocus Tailor

HIGHLIGHTS

- Preview PostScript files
- Visually edit PostScript
- Make last minute changes
- Export to other formats
- Make artwork production ready
- Clean up questionable PostScript

Visual PostScript Editor

With Enfocus Tailor you can open and visually edit any PostScript or Encapsulated PostScript (EPS) file from any source. The document appears in a window exactly as it will print and can directly be manipulated on-screen. Simply click-and-drag to move or resize images, paths, or text; open a text line to correct a spelling mistake; use the color mixer to apply a new color. You can move between pages at random, or zoom in to check and edit in detail.

M Mac OS

2.0

Enfocus Tailor

System Requirements

Enfocus Tailor 2.0 is compatible with:

- Mac OS 7.5 or higher on PowerPC or 68K,
- 16 MB RAM minimum; 32 MB RAM or more recommended

When placing artwork in a layout or preparing a document for prepress production, Enfocus Tailor is the tool to help you meet all requirements.

You can add a missing font, change a spot color to process colors, or set the overprint attributes. Before you separate a PostScript job, use the power of Enfocus Tailor to make corrections: an incorrect price, a missing logo, a color problem, etc. All this in just a matter of seconds!!

The Font Picker lists Font Family and Style in separate columns

You can mix color in gray scale, RGB, or CMYK.

The Spot Color Panel lists all the used spot colors with their names

The Graphic Inspector displays the attributes position and statistics of the selected objects
