

IF MONKS HAD MACS...

USER'S GUIDE

TECHNICAL SUPPORT: (914) 591-5500

REGISTRATION AND SOFTWARE SUPPORT

Please fill out and return the enclosed warranty card. This registers your copy of the software and helps us keep you informed about updates and other software you may be interested in.

If you ever have problems with Voyager software, please call us at (914) 591-5500.

TECHNICAL REQUIREMENTS

- Any color Macintosh
- 3,500 of free RAM (at least 8 MB installed)
- 13-inch (640×480 resolution) or larger color monitor
- CD-ROM drive

SETTING UP

These instructions assume a basic familiarity with the Macintosh operating system and interface conventions. Please refer to your Macintosh documentation for help with any of the operations described in this section.

Before you can use *If Monks had Macs...*, you should:

- Copy the *If Monks...f* to your hard drive
- Install the extensions provided on the CD if necessary

Getting Ready to Install Software from the CD

1. Insert the CD into your CD-ROM drive according to the drive manufacturer's instructions.
2. Double-click the CD's icon. A window showing its contents will open.

Copying the *If Monks... Folder*

To install *If Monks had Macs...*, drag the *If Monks...f* from the CD window to your hard drive.

Installing Extensions

1. Open the Extensions folder on the CD. The folder contains current versions of extensions necessary to use *If Monks had Macs...* If you

already have these or later versions installed, you do not need to install anything. If in doubt, proceed to step 2.

2. Drag the extensions to the System Folder on your hard drive and drop them (do not open the System Folder first). Your Macintosh will guide you through the rest of the installation.
3. If you installed any extensions, restart your Macintosh.

GETTING STARTED

Every time you wish to use *If Monks had Macs...*, insert the CD into the CD-ROM drive and double-click the copy of *If Monks had Macs...* in the "If Monks..." folder on your hard drive.

A few moments after launching *If Monks had Macs...*, you will find yourself in a library overlooking a cloister. You can then just relax to sound of the fountain, and, if you wait a few moments more, to the timeless beauty of a Gregorian chant, or you can begin to browse the library's 24 volumes. The Library Guide is a good place to start. There are three ways to access the books.

1. On your desk in the library is a four-sided revolving bookcase. This bookcase holds the library's four collections. Move the cursor over the triangle-arrows on its top-left or top-right side and click to pull the collection on that side of the case towards you. Click on a book to open it.
2. In the lower right-hand corner of every book in the library is an icon of the revolving bookcase. If you click this quickly it will take you back to the revolving bookcase and your desk in the library. If you hold the mouse button down on the bookcase icon a menu will pop-up. The first two choices on the menu take you back to the revolving bookcase, or to the sampler page described below. But below these two choices are the names of the library's four collections of books. If you move the cursor over the name of a collection, all the books in that collection pop-up. If you select any one of the books and let go of the cursor you will go directly to that book. (In the Journal the bookcase icon is on the icon bar).
3. On the Library Guide's Sampler card you will see on one page small visual details from each of the books laid out like the candies in a

chocolate box sampler. Move the cursor over a detail to discover its name, click on it to see a preview. If you decide to examine the book click on the button that says, "open this book!"

Custom Installations – for Advanced Users

To gain more working space on you hard drive, you may remove any of the library volumes in the "If Monks... resources" folder except "If Monks Player" and "Home." Do not rename the "If Monks..." folder or move or rename the "If Monks... resources" folder. If you want to keep any of the volumes in the folder labeled "Expanded Books," you must keep "The Library" and "Notebook." If you try to access a volume after you have trashed it, you will be given an opportunity to find the volume on your CD-ROM.

Some owners of the *If Monks had Macs...* CD-ROM may wish to copy the library's sophisticated journal to their portable computers. The journal will resize itself to fit any Macintosh screen. All you need to copy is the Journal, the "If Monks Player" and the "Home" stack. Launch the journal by double-clicking on it (just ignore the warning that the CD-ROM is not mounted).

Advanced users who wish to read other library volumes on their portable computers must copy our "If Monks Player" and "Home" stack because those volumes use fonts that are installed in the "If Monks Player." They must also be aware that volumes such as *JFK Witness* and *The Tower of Babel* will not work without the CD-ROM because they access CD-ROM based resources.
